

COMMUNITY VISIONING SESSION

4.11.2016

Summary Notes

- Most issues fit into one of the following six categories: transportation, community livability, schools, land use and housing, infrastructure, public spaces
- Near universal support for prioritizing safe and complete bike/ped systems.
- Lots of discussion around schools and the quality of schools
- Sustainability is a big theme among residents who participated.
- Lots of support for placemaking and streetscaping components (i.e. downtown, gateways to the city, trees and green plantings).
- Desire for a variety of housing types, styles, and price points
- Many comments related to the Walmart site and other parking-intense sites. People generally wanted to see increase in overall density in St. Anthony (too many seas of parking)
- Desire to see continued innovation in stormwater control and quality improvement

See *Summary of Key Strategies* and *Issues and Opportunities Summary* for transcribed comments.
