

## 2021 Street and Utility Improvement Project Construction Update #18

### Current Events

The Contractor was onsite this week (week of June 6<sup>th</sup>) removing deficient concrete sidewalk, driveway panels, and curb in preparation for the new concrete to be placed on Friday, June 10<sup>th</sup>.

In addition, the Contractor has begun regrading and/or reseeding settled turf areas and areas where turf has not been fully established.

### Future Events

The Contractor will continue regrading and/or reseeding settled turf areas and areas where turf has not been fully established and replacing select trees the week of June 13<sup>th</sup>.

The Contractor has tentatively scheduled the final lift of asphalt pavement to be placed towards the end of the week or into the following week (week of June 20<sup>th</sup>). The roads will be reduced to one lane during paving operations. Traffic will be allowed to travel on the new surface within a few hours after the pavement has been placed.

**Please be aware this schedule may change as a result of weather conditions or other activities beyond the Contractor's control.**

### Caring for Your Newly Seeded Lawn

Please refrain from mowing your lawn shorter than 3.5-inches for at least one year following seed placement and continue to water your lawn at least 2-inches of water a week, especially during the months of June, July, and August.

### Tips of the Week

- If you have a lawn irrigation system that was repaired during the street reconstruction project, please take a moment to test your system is working properly. Please notify Jake Grainger if additional repairs are necessary.
- Please don't hesitate to water your lawn if it is a hot day and you notice the seedbed is dry. Any additional watering you can provide will only result in a healthier thicker lawn.

### Project Contacts

*Onsite Project Rep: Jake Grainger (612) 364-5319*

*Project Manager: Katie Koscielak (612) 282-3641*

*City Engineer: Justin Messner (612) 388-9652*
